EDUCATION

Texas Tech University, Lubbock, Texas
Bachelor of Science in Computer Science | Minor in Mathematics

Graduation Date: Spring 2027
GPA: 3.3

TECHNICAL SKILLS

- **Networking & IT:** TCP/IP, VLANs, DHCP, DNS, OSPF, NAT/PAT, Ethernet, PoE, VoIP, Wi-Fi, LACP, structured cabling
- **Systems & Tools:** Windows, Linux, Cisco Packet Tracer, Git/GitHub, Microsoft Office, Dynamic Forms, SilkTide
- **Programming:** C++, C, Python, Java, Assembly, JavaScript, HTML/CSS, React.js

WORK EXPERIENCE

Triumph Public High Schools, Lubbock, TX

Tier 1 IT Specialist

June 2026 – Present

- Provide Tier 1 technical support for staff and campus technology, troubleshooting hardware, software, network connectivity, printers, and VoIP systems.
- Diagnose Ethernet drops, switch ports, PoE devices, IP phones, wireless connectivity, and other network-connected endpoints.
- Support campus IT infrastructure including network switches, structured cabling, patch panels, computers, printers, and classroom technology.
- Troubleshoot Windows systems and network-connected devices, document technical issues, resolve incidents, and escalate server or network problems when necessary.

STEM CORE, Texas Tech University

Communication Liaison Intern

August 2025 – June 2026

- Built and supported Dynamic Forms with conditional logic to streamline internal processes and reduce administrative workload.
- Updated and managed the STEM CORE website, improving usability, accessibility, and communication with partner schools.
- Maintained STEM lab equipment and inventory while supporting K–12 outreach through event preparation, logistics, and technical documentation.

PROJECT EXPERIENCE

Enterprise Network Design - Cisco Packet Tracer, Lubbock, Texas

Personal Project

2026

- Designed and built a multi-site enterprise network using VLAN segmentation, inter-VLAN routing, OSPF, DHCP, DNS, NAT/PAT, VoIP, and Wi-Fi.
- Configured LACP EtherChannel redundancy, trunk links, port security, IP addressing, and routing between multiple network segments.
- Troubleshot routing, DHCP, DNS, OSPF adjacency, and Layer 2 connectivity issues; validated end-to-end connectivity and documented device configurations on GitHub.
